22
23        double result = 0;
24
25        switch (choice) {
26            case 1:
```

Main.java

```
25 switch (choice) {
26     case 1:
27         result = num1 + num2;
28         break;
29     case 2:
30         result = num1 - num2;
31         break;
32     case 3:
33         result = num1 * num2;
34         break;
35     case 4:
36         if (num2 != 0) {
37             result = num1 / num2;
38         } else {
39             System.out.println("Cannot divide by zero.");
40             return;
41         }
42         break;
43     default:
44         System.out.println("Invalid operation.");
45         return;
46 }
47
48 System.out.println("Result: " + result);
49 }
50 }
```

Output

```
^ java -cp /tmp/J7LNocSmYH SimpleCalculator
Simple Calculator
Enter first number: 30
Enter second number: 38
Choose operation: 1. Addition
2. Subtraction
3. Multiplication
4. Division
Enter operation number: 1
Result: 68.0
```
